Market Week

While inspection is not considered a very reliable indicator it is generally conceded to outdoors that Rome was warmest twice.

It continues [illegible] the challenge of Rome to us for God's sake appreciate is strangely continued with a complacent supporting the matter age with a Coalition or Episcopal women. Remember the wife is represented as a Hollander. Ex. 16:20; or a Kanite (Judges 14:4-9).

It is our opinion that he was married twice. But what of it? We do not propose to be facetious but we do not hesitate to say, a Bible Class is not a society for the diffusion of useless knowledge. There are things of such vast importance that it hardly becomes us to designate the short time allowed to us on Sunday mornings for the discussion of matters that are immaterial.

This paper cannot undertake to discuss Bible questions or exegesis.

Supt. Featherston has resigned and has secured a position we learn in Richmond with the new tax commission. J. A. Burke has been appointed Supt. of schools. The fight made against Mr. Featherston when he was up for re-appointment last year resulted in an agreement whereby he was to resign after one year. Then Prof. Crawley, who was opposing him withdrew from the contest and the school board raised his salary to $2,000. The net result of the efforts of those opposing the old superintendent was that the Professor's salary was raised and Mr. Burke gets the superintendency and Mr. Featherston is taken care in a state office at Richmond—all are now on the pay roll and all have our best wishes for the proper administration of their offices. The friends of Mr. Burke assert that he will make an efficient superintendent.

Va. Banks Safe

Virginia banks are in a highly satisfactory condition, according to a statement issued by M. E. Bristow, chief examiner of banks for the state corporation commission.

Mr. Bristow said:

"I would call attention to the fact that of the forty-nine banks stated to have closed their doors the 13th, it should rather be referred to as one failure, as they were members of a chain system, and were so involved and interdependent that when any considerable portion of them faced trouble it was calculated to carry down the rest.

"The chain is composed of 120 banks it is shown. It is my opinion that this trouble was caused by speculation in Florida during the recent past, and if true, was to be expected.

"In Virginia, we have no such condition, and I know of no speculation on the part of Virginia banks anywhere. No institution in Virginia has as many as a half dozen branches. And when several branches are maintained the rule is to limit them to the city of the parent bank or the near-by locality. This makes them but so many doors to the home bank. We have no chain banks with us and I know of no tendency in that direction. Such branch banking as we have

Putting Teeth in Separator Claims

TALK is cheap, and it is easy to make extravagant claims. This is true of cream separator claims. If there is the slightest doubt in your mind which separator really does skim cleanest, just try this simple test:

Put a De Laval side by side with any other separator of equal capacity. Run both at their proper speeds. Then run the same grade and test of milk or cream from temperatures of 90 degrees to 100 degrees through each machine. Note the bowl and the cream spout of the De Laval. Then note the other machine and the cream. Which one gives the whiter, richer cream? Then run the skim-milk from the De Laval skim-milk spout into a glass and the skim-milk from the other machine into another glass. Which one do you want for human food? Which one is easier to turn and more powerful to drive?

The new De Laval is the best cream separator ever made. It has the wonderful "floating" bowl—the greatest separator improvement in 25 years. It is guaranteed to skim cleaner, run easier and last longer. It is the crowning achievement of 48 years of separator manufacture and leadership.

Liberal trade allowances made on old separators.

Hot Fight

On last Thursday above Massie's Mill, in Nelson County, an attempt was made by a posse to capture Gilbert Tyree, who is said to be wanted in Texas for murder, and also for breaking jail in Nelson some years ago.

Using a machine gun of the forty-five caliber riot type, with a killing range of a thousand yards, Gilbert Tyree, 22, mountaineer, alleged murderer, automobile thief etc., held 11 men at bay when they came upon him barricaded behind a locust tree.

The posse, after attempting to arrest Tyree by a demand of "hands up," and receiving a volley from the machine gun which made them all scramble for cover and for an advantageous position whence they could attack the man with a degree of safety for themselves.

Rucker Brent, 20, of Massie's Mill, later came upon the man higher up the mountain, and shot at him three times with a shot gun before the machine gun was unleashed again, spattering dirt above the head of Brent, who immediately dropped into a deep ditch. Tyree then disappeared.

No one was injured in any of the fighting, it is thought although Brent claims to have hit Tyree with the number eight shot which he had loaded his gun.

Following the two unsuccessful attempts to capture Tyree the posse dropped back to Massie's Mill, leaving a guard to see that he did not cross the mountain, and called for bloodhounds.

After a wait of several hours, the dogs of A. E. Stump, of Lynchburg, arrived and a search was instituted by a heavily armed posse. Alex Bingham, one of the best auto inspectors in the state was a member of the posse and brought back as a trophy of the fight one of the riot guns which is attracting much attention in our town. He also shows one of the battered steel bullets which penetrated a locust post behind which Alex was seeking safety. Many shots were fired at the fleeing fugitive as he dissappeared in the mountains, but no word of his capture has yet been received. The posse captured two fine cars and two men relatives of the fugitive and they are in Nelson Jail.

VERA

After four days of torrid weather we are having a surcease, due to refreshing showers. Existence is becoming bearable once more.

We notice in the papers that in several different sections of Virginia, water sources, springs, etc., have dried up, as well as wells going dry—this must be a favored section of the country; as springs abound and we heard of not even one spring drying up—we have had a great deal of hot dry weather this year; but there is still plenty of water.

The "bean beattle" seems to have made its appearance in some parts of Virginia. So far, we have heard of none in this section.

There will be a lawn party and play at Vera on Sat. July 31st, the play, entitled "Aaron Slick from Pumpkin Crick" will be rendered by Vera talent and should be good.

Mr. William Beale, while helping thresh wheat last week had the misfortune of having a pitch fork run through his shoe into his foot, which made a painful though not dangerous wound.

We regret to report the illness of both the venerable Thomas Harvey, and his good wife. Mr. Harvey is a veteran of the civil war; and the unveiling of the tablet at the surrender grounds, recently, was delegated to him; he being the oldest veteran present. Mr. Harvey is 91 years old.
